PROJECT: BASSGAS AND HAZIRA OFFSHORE PLATFORM GENERATOR SETS  
Re: Under-Raps' Product and Service

Energy Power Systems' most recent packaged essential and emergency generator sets, for the petroleum industry, were shipped to Indonesia and Thailand for incorporation into new offshore platform manufacture and assembly.

The size of these packages restricted their shipping arrangement to flat rack mounted on open deck. In the past we have experienced degradation of equipment finish when shipping in this manner, despite the use of heavy-duty tarpaulins and anti-corrosive treatment.

For these most recent shipments, Under-Raps supplied and applied their anti-corrosive shrink film to the packaged generator sets. The quality and efficiency of their service was commendable and, more importantly, the end result was ideal. In all cases the equipment was unpacked at overseas platform manufacturing sites, and found to be in the same as-new condition in which it left our works.

As a result, it is our intention to employ Under-Raps on future export packaging of all similar Caterpillar equipment.

We thank Under-Raps for their valuable contribution in maintaining our delivery of high-quality equipment, and have no hesitation in recommending their excellent product and service.

Yours sincerely

Tim Pritchard
